products & services

CLOUD-BASED SOLUTIONS

We develop full-scale web applications with customized Content Management System (CMS). Among our fully developed and tested Web-Based Applications are: Store Audit with real-time content updates on scores, information, and graphical reports for . HR Dashboard to manage employees daily assignments including attendance and store assignments, Purchase Request for managing store requests and monitoring deliveries from warehouse and Sales Monitoring for managing sales reports from different stores.

iBEACONS

We deploy iBeacons as well as mobile apps development with ibeacons detection capability which is one of our advanced mobile solutions. This can provide notifications within facilities such as malls where GPS can no longer be reliable. From welcoming people as they arrive at a sporting event to providing information about a nearby museum exhibit, iBeacon opens a new world of possibilities for location awareness, and countless opportunities for interactivity between iOS devices and iBeacon hardware.

MOBILE SOLUTIONS

We develop native mobile apps using Android Java and/or Kotlin to support the latest version of Android. And for iOS, we develop apps using objective C and/or swift to support the latest version released by Apple. And since these are native mobile apps, the speed is very reliable and hardware integration is quite accurate and effective.

We also use the latest version of React Native Framework to develop iOS and Android apps in JavaScript programming language.

ARTIFICIAL INTELLIGENCE (AI)

We develop chatbots that can be deployed to Facebook Messenger Platform together with other FB Messenger Plugins such as Messenger Extensions that can be utilized for customer service, information acquisition or user engagement and app gamification.

AUGMENTED REALITY (AR)

We develop mobile apps that integrates augmented reality (AR) or augmented view of real world elements such as image, video, sound, etc. This AR mobile apps can be utilized for marketing or brand promotion, training, work, tourism, health and may others.

KINECT ENABLED GAMES

We develop Kinect enabled games utilizing Kinect from Xbox that can be used in events, product launching or promotions.

USER INTERFACE/USER EXPERIENCE DESIGN

We develop and create design wireframes, mockups for the overall look and feel of the application and also to ensure that navigation within the application logically flows from one step to the next.

We also create a cohesive style guide to ensure that a consistent design language is applied across the application, as well as where priority buttons, icons or modules are to be placed for the ease of use and intuitive mobile interface.

PROJECT MANAGEMENT

We provide project management services such as tracking of project progress, consumed man-hours and deliverables through project management tools. We also provide regular project status updates and maintain constant communication with project owner to ensure that project deliverables will be accomplished and target launch or project deadline will be met.

QUALITY ASSURANCE AND TESTING

We perform tests to verify that the applications conform to functional specifications and UI/UX design prior to Application launch or Google Play/App Store release. We also do parallel application testing with project owners by deploying test/beta versions during the course of development via Fabric, while creating a sandbox server for web applications.

PRODUCT/BRAND DEVELOPMENT

We design logos, create graphics, and do product packaging layouts perfect for new brands, products or companies.

HARDWARE INFRASTRUCTURE

We configure and setup Servers, workstations, Cisco devices, WIFI, Local Area Network, Wide Area Network, VPN, CCTV, etc.

100 REVOLVING RESTAURANTS
FRENCH

ABOUT

Chef Jessie's 100 Revolving Restaurant is a modern 360° revolving, fine dining restaurant in the Philippines, featuring the classic French cuisine of Chef Jessie Sinsaco of Le Souffle fame.

VERDICT

Overall, we like Chef Jessie's 100 Revolving Restaurant for its excellent and authentic French cooking, served the classic Chef Jessie way. The ambience has a classic fine dining look but a bit old school.

It's best to order the dishes the Chef is famous for. The menu is actually familiar if you're already a fan of Chef Jessie's Le Souffle. We recommend the French onion soup, the seafood bisque, the mussels with bacon, truffle pasta, the grilled lamb chops, the Chilean sea bass with foie gras, and the souffles for dessert. They also have a good selection of wines that would go well with your meal.

So whether you're just searching for a quiet, romantic fine dining evening, looking to host an impressive

UNFOLD MOBILE APP

Unfold is an app that makes Master Choa Kok Sui's teachings more modern and accessible than ever before. The app allows users to receive daily nuggets of inspiration from his teachings and also allows them to personalize the quotes through various fonts, backgrounds, and stickers. Users can then share these personalized quotes through popular social media accounts such as Facebook, Twitter, Instagram, and Pinterest.

Several Pranic Healers have also contributed artwork to this project, and will be featured on the app. This is truly a labor of love and a true collaboration between IISPFI and Pranic Healers around the world, and IISPFI is proud to share their efforts with everyone.

MYBLOOD PROFILE MOBILE APP

My Blood is a healthy lifestyle app that graphically presents and tracks your lab results. It gives health recommendations based on your calculated risk of developing lifestyle diseases. This app is only available for use on select tests from partner laboratories.

MYBLOOD PROFILE IN CHATBOT

Chatbot integration with myblood fb messenger.

The screenshot shows a Facebook Messenger conversation with the 'MyBlood' bot. The user has a profile picture of blood test tubes and a bio indicating 59 likes, including Jovelle Gabnton Barongan and 6 friends. The bot replies with a 'Typically replies instantly' message. The user asks about a barcode sticker, and the bot responds with instructions to take deep breaths and enter the barcode number. The user enters '171234567'. The bot asks for personal details like first name, last name, and date of birth. The user provides 'First name: MyBlood', 'Last name: Chatbot', and 'Date of birth (MM/DD/YYYY): 01/01/2017'.

LIFE KONNEKT MOBILE APP

LifeKonnekt helps you chronicle your thoughts, feelings, ideas and experiences and allows you to share them with the people who really matter to you.

FEATURES:

- Easy to Use. Has a simple interface for making your journal entries and saving your multiple photos.
- Discreet. Share your journal entries - but with only up to 12 close friends. You and your entries are not visible to your friends' friends.
- Private. Keep journal entries to yourself if you don't feel like sharing.

WHY LIFEKONNEKT - A SOCIAL JOURNAL?

We believe in the power of journaling, introspection and the magic of the strong tie. Support and be supported when life gets interesting.

FOOZE

The fastest and easiest way to satisfy your late night cravings. Fooze is the 1-tap delivery app for your favorite late night munchies. Every night, we feature a different selection of three delicious munchies from great late night restaurants. Simply choose your munchie, and tap to order. Our meals are always a convenient all-inclusive price.

KEY FEATURES

The image displays three screenshots of the Fooze application. The left screenshot shows the 'TONIGHT'S Foozes' screen with meal options. The middle screenshot shows a specific order for 'Bark Manhattan' with a total of '\$15.00' and a 'PLACE ORDER' button. The right screenshot is a screenshot of a web browser showing the 'Restaurant Information' page for 'BARK MANHATTAN', displaying the restaurant's name, address, contact information, and a photo of the storefront.

RBX INTEGRATED SOLUTION

The RBX INTEGRATED SOLUTION (RBXIS) is an enterprise-wide solution designed for Rice In A Box (RBX) for the monitoring and management of all their daily sales and purchase order reports from different outlets/branches (RBX-owned and/or franchises). The RBXIS consists of web, mobile and cloud solutions that handle and manage all branch transactions from purchasing to sales, which are consolidated to daily and executive reports for an effective and efficient management decision-making.

The said solution includes the following:

1. The RBX Web Application is the Mobile Backend for all the digital data of all the mobile apps. The same app will also be utilized to define and configure credentials such as user access rights, privileges, prices, item/menu inventories and other data for all mobile apps. Administrators of the app can create, delete and edit items, as well as monitor and manage user activities. This web application will be designed to run on all popular web browsers such as MS Internet Explorer, and Mozilla Firefox.
2. The RBX Branch Mobile App is designed in Android platform and serves as the main tool for users or service crews in different branches (both company-owned and franchises) in reporting their day-to-day sales so their immediate district supervisors can monitor incoming sales and the main branch can receive real time branch reports. The same app is also used by the branches to order ingredients and store stock to RBX Main Branch for delivery to the more than 200 branches and franchises of Rice in a Box. The purchase/ordering system enables RBX to efficiently monitor stock requirements of these branches/franchises to prevent overstocking and food spoilage.
3. The RBX EMS Mobile app, also designed in Android platform serves as the main monitoring and management tool for RBX Executives, Managers and Supervisors. The app provides necessary modules to monitor different transactions and view reports real-time at any time of the day. Things such as daily sales reports and purchase orders can be viewed via a secured Internet access. Thus, RBX executives, managers and supervisors can always view updated reports wherever they are as long as they have Internet access. Unlike other management reports, the EMS reports are accessed real-time thus reports can be seen immediately anywhere or at anytime as soon as reports are sent from branches.

BUSINESS TAGGING

Business Tagging for Android is a mobile application specifically designed for Local Government Units in the Philippines.

This app is a customized business tagging solution for Android and iOS tailor-fitted to adapt to the current requirements of most of the local government units in the country.

This is a mobile app that shall be deployed for fieldwork activities such as tagging for landmarks, establishments and other structures that maybe essential for zoning administration. This mobile app is an online-ready app that can automatically sync data into its cloud-base server and database. This means that all information gathered in the field will automatically be sent and saved into the main server in our Cloud Facility. In effect, users inside the office shall automatically receive updates real-time. Thus, the local executive as well as the local managers shall receive updated reports anytime of the day.

And in order to facilitate such transfer of information across the local executive and managers, this app also comes with an iPad version that was primarily designed for managers who require real-time reports in visual forms such as bar and/or pie graphs, whichever is applicable.

This small but very powerful app enables the said office to perform its significant tasks including mapping of specific locations, capturing and saving photos of establishments, encoding and saving specific information such as names of businesses, automatic syncing of information via Internet to cloud servers, and offline capturing mode.

INFORMATION FOR LOCAL EXECUTIVES, ADMINISTRATORS AND DEPARTMENT HEADS (iLEAD)

iLEAD is an executive information system primarily designed to work with a Relational Database

Management System such as Oracle database and intended for the Local Chief Executives, Administrators and Department Heads of Local Government Units made available in mobile gadgets (smart phones, tablets, phablets, etc.).

The said app features timely and accurate management, statistical, and financial reports that are generated online and real time from the servers of the Local Governments. These data and reports are made accessible and ready everywhere and at any time in their mobile devices improving planning, decision-making, and implementation capabilities of Local Executives. In the past, these reports take hours or even days to generate. But now, with iLEAD, reports can be acquired in seconds.

The app utilizes the power of mobile gadgets or smart phones that enables users to gather accurate and up-to-date information without the need of technical knowhow or assistance from technical staff
